BOTANICAL GARDENS

More than just perfectly manicured foliage

ST. VINCENT & THE GRENADINES

The Caribbean you're looking for

History

Not even a mutiny on the *Bounty* could keep the first breadfruit tree from Vincy's shores. A descendant of the original is waiting to be viewed.

Relationships

"Until death do us part" takes work, no matter the species. Vincy parrots keep their vows by doing everything together. Watch them for just a few seconds and fall in love.

Economics

How did centuries-old experimentation affect Vincy's agricultural economy? See plants like arrowroot, cocoa and various exotic spices that brought growth which continues today.

Functionalism

Have your wedding here and you won't need to order flowers. Hibiscus Walk replaces the traditional aisle. The backdrop for photographs is the picturesque lily pond. After that, live happily ever after.

About the Botanical Gardens

- Situated on 20 acres of land
- At 240 years old, it's the oldest in the Western Hemisphere
- Captive breeding at our aviary safeguards the endangered St. Vincent Parrot.
